Re: WC Docket No. 14-58

2015 ETC Annual Report of Cameron Telephone Company LLC (LA)

Study Area Code 270425 Request for Confidentiality

Dear Ms. Dortch:

John Staurulakis, Inc. ("JSI"), on behalf of its client Cameron Telephone Company LLC (LA) (the "Company") hereby requests, pursuant to Sections 0.457 and 0.459 of the Commission's rules,¹ withholding from public inspection certain information contained in an attachment to the above referenced reporting requirement. The Company provides the following in support of its request, numbered consistent with the subparagraphs of Section 0.459(b).²

- 1. The information for which the Company is seeking confidential treatment is an attachment to the Company's annual reporting information pursuant to Sections 54.313 and 54.422 of the Commission's rules ("Report").³
- 2. Rate-of-Return Eligible Telecommunications Carriers ("ETCs") must file with the Commission an initial section 54.202(a) Five-Year Service Quality Improvement Plan ("Five-Year Plan") which is contained in the attachment to the 2014 Report.⁴
- 3. The information contained in attachment for which the Company seeks the withholding from public inspection is the entirety of data pertaining to the Company's Five-Year Plan provided at FCC Form 481 Line 112 attachment. Information of this nature is confidential commercial information routinely withheld from public inspection.

¹ 47 C.F.R. §§ 0.457, 0.459.

² 47 C.F.R. § 0.459(b)(1) through (9).

³ 47 C.F.R. §§ 54.313, 54.422.

⁴ See In the Matter of Connect America Fund, WC Docket No. 10-90, Order DA 14-591 (rel. May 1, 2014).

4. With respect to identifying the degree to which the subject attachment concerns a service that is subject to competition, the information is of a financial and competitive nature regarding the provision of telecommunications services. The Line 112 attachment contains competitively sensitive information related to proposed improvements or upgrades and maintenance the Company's network.

In its March 5, 2013 Order, the FCC. The FCC specified that for rate-of-return carriers, the five-year plans "should describe the carrier's network improvement plan, which should provide greater visibility into current plans to extend broadband service to unserved locations in rate-of-return service territories." Accordingly, because the Company is a rate-of-return carrier, it must file a five-year service improvement plan which contains proprietary, competitively sensitive information related to the Company's existing network including the specific locations of customers as well as describe proposed improvements or upgrades and maintenance of its network throughout its service area. Specifically, this information sets forth services provided by the Company over its existing network including specific locations of customers as well as planned network improvement and maintenance for the years 2015 through 2019 including project start and completion dates, population that will be impacted by the improvements and upgrades at the wire center level and projected capital costs associated with the improvements and upgrades and operating costs associated with maintaining the network including depreciation for investments that have already been made. As such, this information contains competitively sensitive information related to the Company's existing network as well as detailed plans at the wire center level for network upgrades and maintenance projected for the years 2015 through 2019.

- 5. With respect to identifying possible exposure to competitive harm, the information contained in the Line 112 attachment is information that is not customarily released to the public. This information is proprietary to the Company, is unique to the Company's serving territory and is only known to the Company and its authorized agents. If the Information is not protected, it would have economic value to potential competitors who would be able to target their marketing to specific customers. In a competitive telecommunications marketplace, this type of information is highly sensitive. If publicly disclosed, it would enable competitors to craft business plans that capitalize on their knowledge of the locations of the Company's customers which would place the Company at a competitive disadvantage.
- 6. With respect to steps the Company has taken to ensure against unauthorized disclosure of the information contained in the attachment, the Company is filing the attachment under seal. The Company uses the information contained in the Five-Year Plan to ensure that its customers continue to receive state-of-the-art high quality telecommunications and broadband services that the Company has

⁵ See Connect America Fund et al., WC Docket 10-90 et al., Order, DA 13-332 (rel. Mar. 5, 2013) ("March 5, 2013 Order") at para 9 citing Section 54.202(a) (1) (ii).

been providing to them for many years as well as to satisfy mandatory reporting requirements and does not share the information for which protection is sought. The Company protects the secrecy of this information with a security protocol that ensures the information is not inadvertently disclosed or disseminated. Only directors, managers and employees with a direct need to know are authorized to access the information.

- 7. Any previous versions of this information are not publicly available.
- 8. Because the information is not routinely available, a need exists for maintaining the confidentiality of this information permanently.
- 9. Not applicable.

Based on the preceding, JSI respectfully requests on behalf of the Company that the Commission grant confidential treatment under Section 0.459 to Company's Five-Year Plan provided at FCC Form 481 Line 112 attachment.

Please contact the undersigned with any questions regarding this request.

Sincerely,

John Kuykendall JSI Vice President 301-459-7590

Response to Line 510 - Service Quality Standards and Consumer Protection Rules

Compliance - Voice and Broadband

In establishing this certification in its 2005 ETC Order, the FCC found that an ETC must

make "a specific commitment to objective measures to protect consumers." The FCC found that

for wireless ETCs, compliance with CTIA's Consumer Code for Wireless Service would satisfy

this requirement and that the sufficiency of other commitments would be considered on a case-by-

case basis.³ In this context, the FCC stated, "to the extent a wireline or wireless ETC applicant is

subject to consumer protection obligations under state law, compliance with such laws may meet

our requirement."4

Cameron Telephone Company, LLC ("Company") hereby certifies that its voice service,

and broadband service where regulated by these laws, complies with applicable service quality

standards and consumer protection rules under Louisiana state law and federal law. These

provisions include, but are not limited to, the following: 1) customer service regulations for

¹ Federal-State Joint Board on Universal Service, CC Docket No. 96-45, Report and Order, FCC 05-46 (rel. Mar.

17, 2005) ("2005 ETC Order").

² *Id.* at para. 28.

³ Id. The FCC noted that under the CTIA Consumer Code, wireless carriers agree to: "(1) disclose rates and terms of service to customers; (2) make available maps showing where service is generally available; (3) provide contract terms to customers and confirm changes in service; (4) allow a trial period for new service; (5) provide specific disclosures in advertising; (6) separately identify carrier charges from taxes on billing statements; (7) provide customers the right to terminate service for changes to contract terms; (8) provide ready access to customer service; (9) promptly respond to consumer inquiries and complaints received from government agencies; and (10) abide by policies for protection

of consumer privacy." Id. at n. 71.

telecommunications service in LPSC Docket No. U-24856;⁵ 2) "slamming" requirements in Docket No. U-25754;⁶ and 3) Docket No. U-24050 containing rules and regulations concerning telecommunications service provider billing;⁷ 4) truth-in-billing rules contained in F.C.C. 47 C.F.R. Part §64.2401; and, 5) compliance with federal CPNI rules, red flag rules and other applicable federal and state requirements governing the protection of customers' privacy.

Concerning broadband service specifically, Company hereby certifies that while there are no applicable state broadband service quality standards and consumer protection rules yet established under the Louisiana Administrative Code by the Louisiana Public Service Commission, the Company discloses rates, terms and conditions on its public web site and the Company complies with applicable federal and state customer protection standards generally applicable to all businesses operating in Louisiana. In addition, the Company adheres to consumer protection obligations for broadband services under federal law. These obligations include, but are not limited to, the following: public disclosure of accurate information regarding network management practices, performance, and commercial terms of broadband internet access services; as a means of providing sufficient information for consumers to make informed choices regarding use of such services, and for content, application, service and device providers to develop, market, and maintain internet offerings as specified in F.C.C. 47 C.F.R. Part 8 §8.3. The Company furthermore will comply with all requirements set forth in the 2015 *Open Internet Order* when it becomes effective.

⁵ Louisiana Public Service Commission General Order, Docket No. U-24856 - In re: Customer Service Regulations for Telecommunications Service Providers. (Decided at the Business and Executive Session held November 2, 2000).

Response to Line 610 - Ability to Function in Emergency Situations for Voice and

Broadband

Cameron Telephone Company, LLC ("Company") hereby certifies that it is able to

function in emergency situations as set forth in the Code of Federal Regulations, Title 47, Part 54,

Subpart C, §54.202(a)(2).¹ The Company's network is designed to remain functional in

emergency situations without an external power source. Additionally, the Company can change

call routing translations as needed to reroute traffic around damaged facilities and to manage traffic

spikes throughout its network.

In emergency situations, the Company functions in accordance with its Emergency

Operations Plan which include provisions for continuity of service and emergency operations

planning. Any central office not equipped with permanently installed standby generators contains

as a minimum eight hours of battery reserve without voltage falling below the level required for

proper operation of all equipment. In addition, all central offices without installed emergency

power facilities have a mobile power unit available which can be delivered and connected on short

notice. The Company's Emergency Operations Plan and emergency power facilities and

equipment support both voice and broadband network equipment in the event of an emergency

situation.

-

¹ Section 54.202(a)(2) requires ETCs that are designated by the Commission to "demonstrate its ability to remain functional in emergency situations, including a demonstration that it has a reasonable amount of back-up power to ensure functionality without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations."
